Course Syllabus

ELPT 1325 – National Electrical Code

Catalog Description: An introductory study of the National Electric Code (NEC) for those employed in fields requiring knowledge of the Code, with emphasis on wiring design, protection, methods and materials, equipment for general use, and basic calculations.

Lecture hours = 3, Lab hours = 0

Prerequisites: None

Semester Credit Hours: 3
Lecture Hours per Week: 3
Lab Hours per Week: 0
Extended hours:
Contact Hours per Semester: 48

State Approval Code: 46.0301

Class section meeting time:

Instructional Goals and Purposes: The purpose of this course is to locate and interpret the sections in the NEC pertaining to electrical installations; calculate the size of conductors, boxes, raceways, and overcurrent protective devices for branch circuits supplying electrical equipment, calculate conductor size, overcurrent protection for service equipment as applied to building services and compute the size of branch circuits, feeders and equipment for motors.

Learning Outcomes:
1. Briefly discuss the history of the National Electrical Code.
3. Box and Enclosure selection to meet NEC requirements.
5. Raceways and Conductors.
9. Hazardous (Classified) Locations
10. Industrial Locations
Specific Course Objectives (includes SCANS):

After studying all materials and resources presented in the course, the student will be able to:

1. Briefly discuss the history of the National Electrical Code. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-ii, 1B-iv, 1 C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C- ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Identify the catalyst that brought about the National Electrical Code (NEC).
   b. Discuss how the NEC began and the purpose of the NEC.
   c. Understand how changes to the Code evolve.
   d. Know what type of information is found within the NEC (layout).
   e. Understand the NEC’s concern with equipment and material standards.
   f. Recognize various trademark logos that denote listed and labeled products.
   g. Comprehend the role of nationally recognized testing laboratories (NRTL) and the National Electrical Manufacturers Association (NEMA) as well as the expanded role of the National Fire Protection Association (NEMA).
   h. Recognize that electrical requirements in addition to the NEC may exist and if so, that compliance is required.

2. Definitions and Terminology. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1 C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C- ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Know the meaning of the term accessible when applied to (1) wiring methods and (2) when applied to equipment.
   b. Know the four categories of branch circuits and be able to list their differences.
   c. Know the correct definitions of words and phrases found in Article 100, which are crucial to the installation of a hazard-free electrical system.
   d. Determine whether a load is continuous or non-continuous.
   e. Know the difference between branch-circuit conductors and feeder conductors.
   f. Know the terminology associated with grounded and grounding.
   g. Give examples of damp, dry, and wet locations.
   h. Determine which conductors are neutral conductors.
   i. Comprehend the electrical vocabulary associated with the word service.
   j. Understand that the authority having jurisdiction (AHJ) could provide special permission, which is defined as written consent.

3. Box and Enclosure selection to meet Code requirements. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1 C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C- ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Perform box fill calculations.
   b. Understand additional markings on boxes.
   c. Describe the general installation requirements for boxes.
   d. Describe box and luminaires support requirements.
   e. Size junction and pull boxes.
   f. Be able to determine the cubic-inch capacity of boxes (metal and nonmetallic) when installing 6 AWG and smaller conductors.
   g. Understand calculation procedures for junction boxes containing 4 AWG and larger conductors.

4. Code Regulations regarding Cable Systems. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1 C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C- ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Understand the general installation requirements for cable systems.
   b. Explain conductor identification and the permissible re-identification of certain conductors.
   c. Discuss grounded conductors provided at switch locations.
   d. Discuss grounded conductor provided for the future.
   e. Discuss underground installations for both direct burial and raceway protected conductors and cables.
   f. Discuss special application cables.

5. Raceways and Conductors. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1 C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C- ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
a. Understand the general provisions related to raceways.
b. List the differences between nonflexible conduit (and tubing) and flexible conduit.
c. Determine raceway fill.
d. Understand conductor ampacity correction factors and conductor temperature limitations.

6. General Provisions pertaining to a Commercial Location. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C-ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Apply General Provisions related to branch circuits in a commercial location.
   b. Apply General Provisions related to receptacles in a commercial location.
   c. Apply General Provisions related to lighting in a commercial location.

7. Non-dwelling Load Calculations. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C-ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Know that receptacle outlets are counted, unlike in dwelling unit load calculations.
   b. Understand how to apply Table 220.44 demand factors to receptacle loads in excess of 10 kVA.
   c. Be able to calculate the receptacle load for banks and office buildings where the actual number of receptacle outlets is unknown.
   d. Be familiar with volt-ampere loads for different types of occupancies, and even for different areas within certain occupancies.
   e. Know when and how to apply Table 220.42 demand factors.
   f. Be aware that track lighting is calculated in addition to the general load
   g. Determine when a load is continuous or not continuous.
   h. Understand that continuous loads require the inclusion of an additional 25% volt-ampere rating in the load calculation.

8. Services, Feeders, and Equipment in Commercial Locations. SCANS (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C-ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Know required minimum vertical wiring clearances for each electrical installation.
   b. Be aware that other associated equipment, above or below the electrical installation, shall not extend more than 6 inches beyond the front of that electrical equipment.
   c. Be familiar with the dedicated space above panelboards, switchboards, switchgear, and electrical equipment.
   d. Be aware that a space equal to the equipment’s width and depth, above panelboards, switchboards, switchgear, and motor control centers, must be clear of foreign systems unless protection is provided.
   e. Know that working space clearances vary depending on the conditions and voltages.
   f. Understand the conditions that require two equipment working space entrances.
   g. Know where to connect grounded and grounding conductors on both the service supply side and load side.
   h. Understand the conditions that require ground-fault protection of equipment.
      i. Have a good understanding of transformer and generator provisions.
   j. Know that grounding and bonding connection points shall be made in the same place, at either the panel or the transformer.
   k. Have an extensive understanding of busway provisions.

9. Hazardous (Classified) Locations (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-i, 2C-ii, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Understand what constitutes Class I, II, and III locations, as well as the parameters for Divisions I and 2 within each class.
   b. Understand the distinction between Division 1’s normal operating conditions and Division 2’s abnormal operations.
   c. Know that Articles 500 through 504 cover requirements for electrical and electronic equipment/wiring, of all voltages, within hazardous (classified) locations with potential fire or
Students

explosion hazards due to the presence of flammable gases (or vapors), flammable liquids, combustible dust, or ignitable fibers (or flyings).

10. Industrial Locations. (1 A-I, 1A-ii, 1A-iv, 1B-iii, 1B-iv, 1C-I, 1C-iv, 2A-I, 2A-iii, 2B-I, 2C-I, 2C-iii, 2D-ii, 2D-iii, 2E-ii)
   a. Be familiar with service entrance provisions with or without a single main disconnecting means.
   b. Know that a raceway (or cable) shall not contain both service conductors and nonservice conductors.
   c. Understand feeder tap rules.
   d. Understand provisions pertaining to conductors supplying a transformer.
   e. Be familiar with transformer vault provisions.
   f. Know how to correctly bond service raceways and equipment.
   g. Be able to accurately connect taps to grounding electrode conductors.
   h. Understand different methods for sizing bonding conductors in paralleled service raceways.
   i. Be familiar with the provision requiring a full size equipment grounding conductor (when used) in each paralleled raceway.
   j. Understand cable tray provisions.
   k. Be familiar with both general and specific motor provisions, that is, motor and branch-circuit overload protection, branch-circuit conductors, branch-circuit protection, feeder conductors, feeder protection, etc.
   l. Understand specific equipment provisions for cranes and hoists, electric welders, electroplating equipment, industrial machinery, and capacitors.

Course Content:
A general description of lecture/discussion topics included in this course is listed in the Learning Objectives / Specific Course Objectives sections of this syllabus.

Students in all sections of this course will be required to do the following:

1. Attend scheduled classes regularly and be on time for every class period. Students can be dropped from a class due to excessive absences. More than two (2) unexcused absences are considered to be excessive.
2. Study the assigned materials, complete and submit homework assignments on time, complete quizzes and exams to assess understanding and comprehension of the material presented.
3. Complete any scheduled lab assignments or class projects. Personal Protective Equipment (PPE) is required to be worn in lab.

Methods of Instruction/Course Format/Delivery:

Students will have access to this course in Canvas and will meet regularly for class each week. Classes will consist of lecture and lab exercises as appropriate. Quizzes and exams may be administered by the Instructor or by an approved testing facility.

Students in traditional, hybrid and Internet classes will have access to courses via Canvas. Students in the traditional class will meet regularly for lecture. Students in the Internet class will be required to take quizzes and exams at an approved testing facility or, they may also be administered by the instructor. Students in hybrid classes will have both in class and online assignments. Hybrid classes are required to read assigned material, take quizzes and exams as assigned by the instructor, and complete assigned homework prior to meeting for the face to face lecture/lab.

The following will be used to calculate the student’s final grade:
**Attendance and Participation**

Students are expected to attend face to face classes and be on time. Students are required to participate in class discussions and work with other students during class exercises.

Attendance is based on the student missing no more than 10% out of the semester without a valid excuse, at which point, the instructor may withdraw the student at their discretion. Any student thirty or more minutes late may be counted absent. Students that leave before class is dismissed will be counted absent. The Instructor reserves the right to dock points on any makeup work resulting from an unexcused absence.

**Lab Exercises**

Students will complete lab assignments designed to teach them how to apply knowledge gained from the textbook to actual electrical circuits.

**Quizzes**

Upon completion of each major assignment, students will take online quizzes over the material covered. Quizzes will generally contain true/false, multiple choice, matching or fill in-the-blank questions.

**Midterm and Final Exams**

There will be two major exams consisting of a Midterm Exam and a Final Exam. The Final Exam will be cumulative.

**Grading Notes**

Missed quizzes or exams due to legitimate reasons should be taken prior to the reporting of mid-term or final grades as applicable. It is the responsibility of the student to reschedule the makeup with the instructor, who reserves the right to change the test format of any makeup quiz or exam. Instructor is not required to makeup work for an unexcused class absence. The Instructor also reserves the right to give full or partial credit for any makeup work that is allowed and that resulted from an unexcused absence.

Attendance is based on the student missing no more than 10% out of the semester without a valid excuse, at which point, the instructor may withdraw the student at their discretion. Any student thirty or more minutes late may be counted absent. Students that leave before class is dismissed will be counted absent. The Instructor reserves the right to dock points for any missed class without a legitimate excuse.

Scholastic dishonesty is treated with the utmost seriousness by the Instructor and Panola College. Academic dishonesty includes, but is not limited to, the willful attempt to misrepresent one’s work, cheat, plagiarize, or impede other students’ scholastic progress.

Grading Scale: A=90-100, B=80-89, C=70-79, D=60-69, F=69 and below

**Major Assignments / Assessments:**
The following items will be assigned and assessed during the semester and used to calculate the student's final grade.

**Assignments**
1. *Unit 1: Introduction to the National Electrical Code*
2. *Unit 2: Definitions and Terminology*
3. *Unit 3: Boxes and Enclosures*
4. *Unit 4: Cables*
5. *Unit 5: Raceways and Conductors*
6. *Unit 12: Commercial Locations General Provisions*
7. *Unit 13: Non-dwelling Load Calculations*
8. *Unit 14: Services, Feeders, and Equipment*
9. *Unit 15: Hazardous (Classified) Locations*
10. *Unit 17: Industrial Locations*

**Assessment(s):**
1. *Unit 1 Quiz*
2. *Unit 2 Quiz*
3. *Unit 3 Quiz*
4. *Unit 4 Quiz*
5. *Unit 5 Quiz*
6. *Unit 12 Quiz*
7. *Unit 13 Quiz*
8. *Unit 14 Quiz*
9. *Unit 15 Quiz*
10. *Unit 17 Quiz*
11. *Midterm Exam*
12. *Final Exam*

**Course Grade:**
The grading scale for this course is as follows:

- Attendance – 10%
- Homework – 20%
- Unit Quizzes – 30%
- Exams – 40%

**Texts, Materials, and Supplies:**
- Calculator
- Notepad and pen or pencil
- Safety Glasses and PPE as required
  Refer to *School of Energy Safety Contract*

**Required Readings:**
- NFPA 70, National Electrical Code, 2014 Edition (Provide by Panola College)
Recommended Readings:
- Electricians Math and Basic Electrical Formulas
  Free download from Mike Holt Enterprises, Inc.
  www.MikeHolt.com

Other:
- For current texts and materials, use the following link to access bookstore listings:
  http://www.panolacollegestore.com
- For testing services, use the following link: http://www.panola.edu/elearning/testing.html
- If any student in this class has special classroom or testing needs because of a physical learning
  or emotional condition, please contact the ADA Student Coordinator in Support Services located
  in the Administration Building or go to
- Withdrawing from a course is the student’s responsibility. Students who do not attend class and
  who do not withdraw will receive the grade earned for the course.
- Student Handbook, The Pathfinder:
SCANS CRITERIA

1) **Foundation skills are defined in three areas: basic skills, thinking skills, and personal qualities.**

   a) **Basic Skills:** A worker must read, write, perform arithmetic and mathematical operations, listen, and speak effectively. These skills include:
      i) Reading: locate, understand, and interpret written information in prose and in documents such as manuals, graphs, and schedules.
      ii) Writing: communicate thoughts, ideas, information, and messages in writing, and create documents such as letters, directions, manuals, reports, graphs, and flow charts.
      iii) Arithmetic and Mathematical Operations: perform basic computations and approach practical problems by choosing appropriately from a variety of mathematical techniques.
      iv) Listening: receive, attend to, interpret, and respond to verbal messages and other cues.
      v) Speaking: Organize ideas and communicate orally.

   b) **Thinking Skills:** A worker must think creatively, make decisions, solve problems, visualize, know how to learn, and reason effectively. These skills include:
      i) Creative Thinking: generate new ideas.
      ii) Decision Making: specify goals and constraints, generate alternatives, consider risks, and evaluate and choose the best alternative.
      iii) Problem Solving: recognize problems and devise and implement plan of action.
      iv) Visualize (“Seeing Things in the Mind’s Eye”): organize and process symbols, pictures, graphs, objects, and other information.
      v) Knowing How to Learn: use efficient learning techniques to acquire and apply new knowledge and skills.
      vi) Reasoning: discover a rule or principle underlying the relationship between two or more objects and apply it when solving a problem.

   c) **Personal Qualities:** A worker must display responsibility, self-esteem, sociability, self-management, integrity, and honesty.
      i) Responsibility: exert a high level of effort and persevere toward goal attainment.
      ii) Self-Esteem: believe in one’s own self-worth and maintain a positive view of oneself.
      iii) Sociability: demonstrate understanding, friendliness, adaptability, empathy, and politeness in group settings.
      iv) Self-Management: assess oneself accurately, set personal goals, monitor progress, and exhibit self-control.
      v) Integrity and Honesty: choose ethical courses of action.

2) **Workplace competencies are defined in five areas: resources, interpersonal skills, information, systems, and technology.**

   a) **Resources:** A worker must identify, organize, plan, and allocate resources effectively.
      i) Time: select goal-relevant activities, rank them, allocate time, and prepare and follow schedules.
      ii) Money: Use or prepare budgets, make forecasts, keep records, and make adjustments to meet objectives.
      iii) Material and Facilities: Acquire, store, allocate, and use materials or space efficiently. Examples: construct a decision time line chart; use computer software to plan a project; prepare a budget; conduct a cost/benefits analysis; design an RFP process; write a job description; develop a staffing plan.

   b) **Interpersonal Skills:** A worker must work with others effectively.
i) Participate as a Member of a Team: contribute to group effort.
ii) Teach Others New Skills.
iii) Serve Clients/Customers: work to satisfy customer's expectations.
iv) Exercise Leadership: communicate ideas to justify position, persuade and convince others, responsibly challenge existing procedures and policies.
v) Negotiate: work toward agreements involving exchange of resources, resolve divergent interests.
vi) Work with Diversity: work well with men and women from diverse backgrounds. Examples: collaborate with a group member to solve a problem; work through a group conflict situation, train a colleague; deal with a dissatisfied customer in person; select and use appropriate leadership styles; use effective delegation techniques; conduct an individual or team negotiation; demonstrate an understanding of how people from different cultural backgrounds might behave in various situations.

c) Information: A worker must be able to acquire and use information.
   i) Acquire and Evaluate Information.
   ii) Organize and Maintain Information.
   iii) Interpret and Communicate Information.
   iv) Use Computers to Process Information.
Examples: research and collect data from various sources; develop a form to collect data; develop an inventory record-keeping system; produce a report using graphics; make an oral presentation using various media; use on-line computer data bases to research a report; use a computer spreadsheet to develop a budget.

d) Systems: A worker must understand complex interrelationships.
   i) Understand Systems: know how social, organizational, and technological systems work and operate effectively with them.
   ii) Monitor and Correct Performance: distinguish trends, predict impacts on system operations, diagnose deviations in systems' performance and correct malfunctions.
   iii) Improve or Design Systems: suggest modifications to existing systems and develop new or alternative systems to improve performance.
Examples: draw and interpret an organizational chart; develop a monitoring process; choose a situation needing improvement, break it down, examine it, propose an improvement, and implement it.

e) Technology: A worker must be able to work with a variety of technologies.
   i) Select Technology: choose procedures, tools or equipment including computers and related technologies.
   ii) Apply Technologies to Task: understand overall intent and proper procedures for setup and operation of equipment.
   iii) Maintain and Troubleshoot Equipment: Prevent, identify, or solve problems with equipment, including computers and other technologies.
Examples: read equipment descriptions and technical specifications to select equipment to meet needs; set up and assemble appropriate equipment from instructions; read and follow directions for troubleshooting and repairing equipment.
