Course Content:
A general description of lecture/discussion topics included in this course are listed in the Learning Objectives / Specific Course Objectives sections of this syllabus.

Students in all sections of this course will be required to do the following:

1. 40 hour rotation at a physician office
2. 40 hour rotation at a non-acute care facility
3. 80 hour rotation at an acute care facility

Methods of Instruction/Course Format/Delivery
Students will observe healthcare facility employees performing the various health information management (HIM) functions in an acute care facility, longterm care facility or ambulatory care facility.

Students will then apply knowledge of health information technology skills learned in the classroom and by observation by performing the various HIM functions. Students will record observations performance of activities in a daily notebook. Students will also complete a report by answering questions about the health information management functions of the facility.

Major Assignments / Assessments:
The following items will be assigned and assessed during the semester and used to calculate the student’s final grade.
1. The student will be observed performing the various health information management functions and be graded by onsite clinical supervisor or the Health Information Management employee instructing the student. Performance Evaluation forms for each activity are included in the Student’s Clinical Practice Information packet.

2. An overall Performance Evaluation of the student will be completed by the onsite clinical supervisor at the end of the professional practice experience. This evaluation and the job evaluations will count 50% of the student’s grade.

3. The student must complete a daily notebook that includes time of arrival and departure, a brief description of activities performed during each day, as well observations of HIM department activities. The notebook will be graded by the instructor and counts 30% of the final grade.

4. The student must present a report at the end of the professional practice experience by answering the questions about the different areas of HIM departmental functions. Questions are in the Student’s Clinical Practice Information Packet.
   - Each set of answers must be titled according to title of questions.
   - Answers must be numbered and written in complete sentences.
   - If activity in the question was not observed or performed, student should explain the reason and record any information known – such as the department responsible for that particular function.
   - Answers must be written with correct grammar, punctuation and spelling.

5. To exhibit professionalism, the student must adhere to all tenets of the American Health Information Management Code of Ethics. The student’s ability to follow the Code of Ethics and to meet the general learning objectives listed above will be evaluated by the onsite clinical instruction and the course instructor.

6. The student must complete an evaluation of the clinical site and include this with the clinical report.

   **All clinical time missed must be made up.** If the student must be absent, he/she must notify the onsite clinical instructor and the HIT clinical coordinator **before** the student is scheduled to report to the clinical site. Only for extreme emergencies will consideration be given for non-notification.
